

Chloromax CCS142D

Digital Disinfection Sensor

**Integrated (Memosens)
Temperature sensor**

- ◆ Measured values are not affected by conductivity fluctuation

- ◆ Maximum process safety through no-contact inductive signal transmission

Application	Digital free chlorine Memosens sensor for all kinds of water: Water treatment (drinking water, service water, process water, distribution network)
Measurement range	0,01..5 mg/l / 0,05..20mg/l free chlorine
Measuring principle	membrane-covered amperometric sensor
Process temperature	0..45°C, not freezing
Process pressure	ambient to 2bar abs
