

Turbimax CUS71D

Ultrasonic Interface Sensor

Memosens immersion sensor for sedimentation tanks in water, wastewater and utilities

* Provides accurate and continuous measurement of interface level or range.

* Automatic wiper cleaning function enables long-term, maintenance-free operation.

* Calibration and sensor-specific data stored in the sensor.

- ♦ Measurement range: 0.3 - 10 m
- ♦ Process temperature: 0 ... 50°C
- ♦ Process pressure: 0 ... 6 bar
- ♦ Output: Digital output for connection to Liquiline CM44x

IP68
