

Micropilot FMR250

Radar Measurement For Solids

Antenna:

- Parabolic DN200/8", DN250/10"
- Horn DN80/3", DN100/4"

Non-contact measurement:

Measurement is almost independent from product properties

Accuracy: +/- 15mm (or 0.04% of range, whatever is larger)

Process connection: Thread, Flange

Max. measuring range: 70m (230ft)

Process pressure: Vacuum...16bar

Process temperature: -40 °C...+200 °C
