

Omnigrad T TST310

RTD Thermometer, Cable Probe

The resistance thermometer is specially suited to temperature measurement in machinery, laboratory equipment and plants in gaseous or liquid media like air, water, oil and others.

- ◆ Max. process pressure (static) at 20 °C: 25 bar

High flexibility through user-specific insertion lengths

- Outer diameter protection tube: 3 mm...6 mm (0,12"...0,24")
- Max. immersion length on request: up to 10.000,00 mm (393,70")
- Operating temperature range PT 100: -50 °C ...400 °C
